Measures and signs

Laptop

Buys a new reading

Seeker

Independently verifies the receipt

Solana Devnet

0.001 test USDC to the operator

peaq Agung

Registered device key and linked work record

Payment stays final. Answers expire.

Payment

The operator keeps the test payment.

Physical answer

The buyer needs a new check after ten seconds.

An edited answer fails signature verification.

A signature identifies a claim's source. Physical truth needs separate controls.

One useful check. Then a network.

Next: one recurring paid check

First buyers to recruit: software teams that pay for remote checks.

Pilot plan: one operator, one buyer, measured cost and reliability.

Revenue plan: integration and service fees.

Today: one provider. The paid pilot will test demand and pricing.
